Assembly Festival Edinburgh Fringe

WebAssembly (abbreviated Wasm) is a binary instruction format for a stack-based virtual machine. Wasm is designed as a portable target for compilation of high-level languages like C/C++/Rust, enabling deployment on the web for client and server applications.

Assembly | government | B

The Whole Genome Assembly (WGA) approach, which is the dominant strategy in use today, dispenses with up front mapping. The entire genome is fragmented and used to construct libraries of varying insert sizes. Typically there are libraries of some smaller size (2, 4 or 6 Kb), libraries of intermediate size (10 - 40 Kb) and libraries with large insert sequences (>100 Kb).
